SHUBHRA KUMARI

COMPUTER SCIENCE & INFORMATION TECHNOLOGY STUDENT

+91-9508600476 | GitHub | LinkedIn | shubhrakumari.er@gmail.com

SUMMARY

Computer Science & Information Technology undergraduate with a 9.01/10 GPA and hands-on experience designing and developing full-stack applications, REST APIs, and database-backed solutions. Applies Java, React.js, Spring Boot, Node.js, MongoDB, and MySQL across academic projects, including Scikit-learn and NLP techniques for personalized recommendations. Strong foundation in data structures, DBMS, operating systems, and data analytics, with practical API validation using Postman. Seeking an entry-level software development role to contribute to dependable, user-focused products and grow across modern engineering practices.

EDUCATION

2023 - Present	B.Tech in Computer Science & Information Technology, Koneru Lakshmaiah Foundation GPA: 9.01/10
2023	Senior Secondary (Class XII), Jamshedpur Women's College Grade: 60.1%
2021	Secondary (Class X), Mount View School Grade: 69%

TECHNICAL SKILLS

Core Courses:	Data Structures, Operating Systems, DBMS, Computer Networks, Data Analytics
Languages:	Java, C, C++, JavaScript, HTML, CSS
Frameworks:	React.js, Spring Boot, Node.js
Databases:	MongoDB, MySQL
Tools:	Git, Postman, Power BI
ML / AI:	Scikit-learn, NLP, Generative AI concepts and APIs
Methodologies:	Agile methodologies, Scrum framework
Cloud:	Cloud computing fundamentals

PROJECTS

Hospital Management System — React.js - Spring Boot - MySQL

- Built a web application for patient registration, appointment scheduling, and medical-record management.
- React.js supports the user interface, while Spring Boot REST APIs handle workflow requests and role-based access.
- MySQL stores application data for patient and appointment workflows; API requests and responses were validated with Postman.

Movie Recommendation System — Node.js - MongoDB - Scikit-learn

- Developed personalized movie recommendations using user preferences and interaction data.
- Node.js APIs handle user interactions, movie filtering, and recommendation requests; MongoDB Atlas stores user and movie data.
- Scikit-learn models and NLP techniques analyze preferences and movie metadata to support personalized recommendations.
- Explored Generative AI concepts and APIs as a potential enhancement to the recommendation experience.

POSITIONS OF RESPONSIBILITY

- KL University Technical Club - Coordinated technical events.
- Core Member, FOCUS Club - Supported content creation and event activities.

CERTIFICATION

- GitHub Foundation
- Udemy - Agile Methodologies and Scrum
- Udacity - Cloud Computing
- Udemy - C++ Programming
- Udemy - Manual Software Testing
